## [DTF-80P automatic packaging machine for tablets/capsules](#)

### **DTF-80P automatic packaging machine for tablets/capsules**

DTF-80P automatic packaging machine for tablets/capsules is controlled by singlechip made by INTEL. The machine can adjust the bag length without replacing the gear, it adjusts the length by cursor. DTF-80P automatic packaging machine for tablets/capsules introduces the advanced chain gear transmission system to seal continuously. It is a high-speed automatic packaging machine. It has a lot of advantages: low noise, stable operation, long service life. The cutter has introduced flail, the incision is smooth and without burr. The unique lubrication system support continuous running on 24 hours.

Applications: DTF-80P automatic packaging machine for tablets/capsules is fit for the packaging of sugar coated tablet, tablet, chocolate bean, etc. in pharmaceutical and food industries.

Features: Bag manufacture, measurement, filling, seal, cutting, count and code printing are all completed automatically. The feeding angle can be adjusted.

Packing materials: cellophane paper/polyethylene, BOPP/ polyethylene, aluminum foil/ polyethylene

Bag size: L: 55-110mm/W: 30-80mm

Packing speed: 50-110bags/min

Measurement range: 5-40ml

Power supply: 220V, 50HZ, 1.5KW

Weight: 350KG

Overall size: 600mm×790mm×1780mm
