

Granulation machine

Oscillating granulator

Oscillating granulator

Oscillating granulator can be used for wet and dry aspect of the granulation process. Adjustment, cleaning and operation are simple. Sturdy, durable, better productivity. The speed of the roller can be adjusted. All parts of our oscillating granulator are made of stainless steel. Our Oscillating Granulator meets the GMP standard, plays an important part in the process of granulation in tablet making. The screen made of metal or stainless steel ensures high outputs and the quality of granules.

Model	YK60	YK90	YK160
Roller Dia. (mm)	60	90	160
Capacity (kg/h)	20-30	50-100	200-300
Oscillation angle	>360	>360	>360
Oscillation frequency (times/minute)	46	50	55
Motor power (KW)	0.25	0.55	2.2
Weight (kg)	55	150	330
Overall size (mm)	460*550*570	750*460*840	970*560*1240
