

Big Tablet Making Machine

Big Tablet Making Machine

Big tablet making machine

Big tablet making machine is a continuous and automatic tablet press which is one of the most important equipments in pressing granular raw materials into tablets or medicines. It is fit for the pressing of medicinal tablets, coffee pills, powder metallurgy, electronic elements, various tablets of pesticide and fertilizer etc. in pharmaceutical, chemical, food and electronic industries. Big tablet making machine can be used in pressing special-shaped circular tablets, and tablets with both sides pressed with trademarks, letters and simple patterns. Big tablet making machine is widely used in small factory, laboratory and hospital.

Model	THP	THP-I	THP-II
Maximum Pressure (KN)	40	100	100
Maximum Dia. of Tablet (mm)	30	40	50
Maximum Filling Depth (mm)	25	45	45
Maximum Thickness of Tablet (mm)	22	35	35
Annular Tablet aperture (mm)	5-10	6-14	6-14

Filling Depth of Circular Tablet(mm)	25	25	45
Weight (KG)	520	750	770
Production Capacity (pieces/hour)	3000	2760	2760
Motor power (KW)	1.1	2.6	3.7
Overall Size (mm)	685 x 565 x 1610	666 x 860 x 1824	666 x 860 x 1824
