

Single-punch tablet press

TP1400 single-punch tablet press (desktop tablet press)

TP1400 single-punch tablet press (desktop tablet press)

Working principle

TP1400 single-punch tablet press (desktop tablet press) is made of stainless steel and easy to operate. The tablet diameter and size can be adjusted by replacing the base formation or displacer. Two steel cams control stepping, does not need to adjust. The raw materials are placed in a vibrating vessel which is shoes shape, when the quantity is big, an external connection hopper is optional. The finished products discharge from a skewed slot, a collecting vessel can be placed here.

Features:

140 pieces/min, different tablet press dies with 5-20mm, capacity can be adjusted, an external connection hopper is optional, easy to move, aseptic design, meet to CE standard, motor drive

Technique parameter

Max. tablet size	20mm
