ZP15/17/19 rotary tablet press

ZP15/17/19 rotary tablet press is designed for pressing round tablets made of different granular materials. It is an important machine to manufacture batch production of tablets. During operation, the speed of the turret rotation, the depth of the filling material and the thickness of the tablets can be adjusted. The mechanical buffer unit will prevent punches and apparatus from overload damage. A vacuum cleaner in our rotary tablet press is fit for cleaning the residual powder or collecting powder materials which can be reused. Our ZP15/17/19 rotary tablet press has been awarded Fine Quality Product by National Medical Management Bureau.
